IT together

# Service Project Management

## Your situation, your objective and your challenge

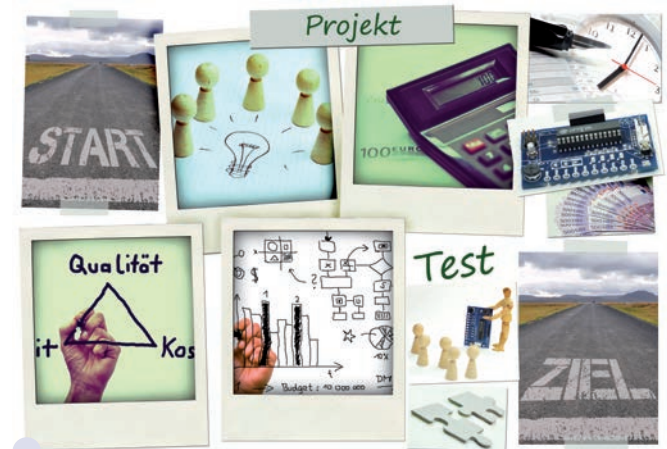

You are planning a large IT project and are looking for a project manager with many years of experience. Or you need support in managing an ongoing project. Your objective is to staff important roles in the project with an appropriate candidate to raise the chances for a success of your project

## What does the service include?

The service „Project Management“ includes a variety of tasks that can be selected individually and can be tailored to the needs of the customer. Tasks refer to the “management of the project” and are associated with the roles of the project manager, a quality project assurance role or a project auditor.

### Exemplary tasks:

- Management of the project in the role of a project manager with all tasks and responsibilities.
- Support of the program management when planning and controlling complex transformation programs, e.g. ERP template programs.
- Support of the internal project manager in managing and controlling a project in the role of a quality assurance manager.
- Support of the business unit as business project manager or delegate to ensure that stakeholders are represented adequately in discussions with internal IT.
- Execution of project audits and crisis management for projects in trouble.

## Which advantages does the service offer for you?

**Project Management offers various advantages for you:**

- Benefit from the experiences of a senior project manager.
- Use of certified methodologies (*PRINCE2*) and the adaption to your needs increases the chances for success of your project.
- An external project manager is only liable to the orderer but not involved into internal obligations of a matrix organization.
- In crisis situations it is advantageous to hire a neutral partner who can act “unpolitically”.
